

 **CLINIXIR**

Your trusted partner for clinical research services

## Who are we?

**Clinixir** Established in 2020 as a private Contract Research Organization under the collaboration of Thailand's six renowned medical universities and Bualuang Ventures, Clinixir provides full-service clinical solutions across every stage of your clinical research journey - from Phase I to Phase IV.

Clinixir takes medical innovations to the next level by providing dependable and accurate data that complies with international standards to support local and international medical innovations in the development of drugs, vaccines and medical devices - all at a competitive rate .

Clinixir can be your ideal partner and guide throughout every step of your clinical trial, from clinical trial planning & design, feasibility, regulatory & startup, clinical monitoring, pharmacovigilance, project management, site engagement, data management and biometrics.

Our expert staff, partnerships and bespoke services enable you to enhance patient engagement, reduce risk, and gain higher quality data, all towards the ultimate goal of developing better treatments and improving patient outcomes.

## Our Vision & Mission

### Vision

To strengthen clinical research capabilities, support local innovation, attract global investment, and drive economic growth in Thailand.

### Mission

To provide world-class one-stop clinical research services that meets international standards for medical product development.

## Our Core Values

### Global Presence

We partner with governments, healthcare organizations, and private-sector companies from around the world.

### Professional Expertise

Our people have a broad and deep range of clinical research knowledge and experience. This expertise enables us to offer cutting-edge clinical research services to all of our partners.

### Complete Clinical Trials Capabilities

We have world-class clinical research facilities. These facilities, combined with the expertise of our team, enable us to support the innovative research of global organizations alike.

# Our Services & Solutions

We offer one-stop clinical research services and solutions to support local and international innovators for the development of medical products and devices.

## Clinical Trial Services

Our expert team will guide you through all steps of your clinical trial journey delivering accurate and reliable results.

Feasibility

Site Identification  
& Selection

Startup

Project Management

Monitoring

Site Management

Data Management  
& Biometric

Medical Writing

## Regulatory Affairs

In today's ever-changing regulatory landscape, our extensive experience in working with Thai governmental agencies allows for stress-free compliance and expedites your treatment development process.

## Biometrics

Our Biometrics unit is composed of highly skilled teams for data management, statistical analysis, statistical programming and data standard implementation; each uniquely fitting into the one common path: efficient processes and reliable data.

## Data Management

To ensure effective operation throughout the process, our data management ranges from storing, organizing, maintaining, protecting to using data securely and in the cost-effective way.

Your trusted partner for clinical research services

# EMR Data Integration

## Prescription Audit Report

We will perform a comprehensive clinical audit to find and assess appropriate drug dispensary practices. To ensure that sponsors are aware of physicians' practices regarding the prescription of medications by product and by indication, this involves referencing prescription frequencies, units, intakes and patient demographics.

## Real World Evidence (RWE)

Topics such as patients' health status and/or healthcare delivery will be addressed using data gathered from electronic medical reports (EMRs), medical claims databases, product patients and disease registries.

## Health Economic and Outcome Research (HEOR)

We will provide a detailed and data-driven analysis on the economic impact of your products or treatments to help you develop effective market access strategies. HEOR integrates with a variety of disciplines, including market access, reimbursement, policy & advocacy, public health, RWD/RWE analytics and epidemiology.

## Area of Expertise

Clinixir researchers deliver excellence in a variety of research fields. Our comprehensive experience conducting trials in a wide range of disciplines enables us to develop and implement study designs suitable for all areas of medicine, pioneering cutting-edge research advancements.

From oncology, to infectious and rare diseases, neurology, metabolic diseases, herbal medicines, medical devices, and other innovative areas of medical research, our team applies its deep knowledge and experience toward clinical solutions that meets international standards.

Oncology

Metabolic diseases

Infectious diseases

Herbal medicines

Rare diseases

Medical devices

Neurology

Clinixir, a private Thai CRO, was founded with the goal of developing an infrastructure for the clinical research industry as part of the national policy on innovation-based development.
